

## **TURKCELL ENVIRONMENTAL POLICY**

Under its Environmental Policy, Turkcell, reflecting its vision of superior digital services for a better future, provides a safe workplace and operates in the awareness of its environmental responsibilities in all its activities. It carries out incentive projects and practices whereby its ecosystem acts accordingly.

### **1. PURPOSE**

Turkcell, in adopting an understanding that considers the environment to the full, minimizes damage to the environment, educates its employees on environmental awareness, and uses clean technologies. Turkcell prioritizes running new projects that protect the ecological environment in which it operates, has put this policy into practice so as to contribute to the economy by developing circular economy awareness, and to maintain long-term environmental sustainability with the awareness of environmental impact across the value chain.

### **2. PRINCIPLES**

Turkcell is attentive to protecting the habitat within its footprint, to using resources efficiently and to preserving the same while developing its offering for a better future through its superior digital services. Turkcell, the first Turkish mobile operator holding ISO 50001 and ISO 14064 certification, carries out its operations of environmental impact by observing the following principles to the greatest possible extent,

- Operating suitable for human life and health
- Efficient use of resources
- Disposal, reduction and recycling of wastes
- Promoting production, consumption and use of renewable energy

Turkcell encourages all of its suppliers and business partners to adopt and actualize these principles it has adopted.

### 3. IMPLEMENTATION

In order to generally put the principles mentioned above and the responsible understanding set out in this Policy into practice for the purpose of compliance, especially with environmental legislation, Turkcell is geared towards;

- developing strategies in order to identify and minimize environmental damage and risk, setting targets for this purpose, monitoring, measuring (CDP, ISO 14064) and evaluating considering the resulting data in decision making,
- using resources in the most effective way in its own operations and encouraging cyclicity by applying the principle of reuse and recycling,
- contributing to the process of establishing public policies intended to, or in connection with the protection of the environment, conducting research and studies related thereto,
- developing, using and encouraging others to use efficient, compatible, environmentally respectful and eco-friendly technologies, products and services by considering the environmental impact of all products and services,
- implementing the "[Green Purchasing Policy](#)" by considering the environmental impacts of purchasing processes,
- prioritizing the improvement of its operational processes within the scope of "[Green Logistics Policy](#)",
- taking initiatives which support new sustainable lifestyles within the scope of the standards intended to limit greenhouse gas emissions,
- adopting appropriate tools in order to ensure compliance with legal limits in design, installation and operation of network infrastructures generating electromagnetic emissions, as well as in the purchase and sale of equipment and devices which can transmit and receive data and sound over wireless connections, following the applicable standards used in scientific research regarding the effects of electromagnetic fields on biological systems and the human body by constantly monitoring the standardization organizations and encouraging the provision of information necessary to implement all of the actions designated under environmental policy,
- Considering the environmental sustainability criteria as part of the evaluation process of possible mergers and acquisitions,

- working to encourage a culture based on the right approach to environmental issues,
- working towards reducing the carbon footprint of office applications, by leveraging digitalization in business processes and developing awareness projects to reduce the carbon footprint of its employees, customers and other stakeholders.

#### **4. ROLES AND RESPONSIBILITIES**

The Environmental Policy is a text prepared for Turkcell management, employees, business partners and contractors in order to be responsive in human and environmentally sensitive work performance.

In this context, Turkcell develops practices and projects for its business partners, contractors and subcontractors in order to work in compliance with the Policy and to cooperate in this regard.

Turkcell carries out encouraging activities to also have other stakeholders act in accordance with this policy.

The Company strives to adopt and implement the principles and purposes of this Policy.

#### **5. POLICY VIOLATIONS**

In case of any violation of the Policy, the issue is reported to the Administrative Affairs Directorate or the Corporate Communications Directorate, Corporate Social Responsibility and Sustainability Office and the Ethics Committee of Turkcell İletişim Hizmetleri A.Ş.

In case of violation of this Policy, if the violating party is an employee, the issue may be submitted to the Ethics Committee in order to consider the execution of the necessary processes regarding the relevant employee. In case of violation of the Policy by business partners and contractors, current business processes are reviewed.
